Bird Nest Project @ Sabah, Malaysia

2 storey bird nest house, designed and built by specialist bird nest consultant

Edible bird's nests are bird nests created by edible-nest swiftlets using solidified saliva
Bird Nest Project @ Sabah, Malaysia

Bird nest soup, a Chinese delicacy

Unit has to be well ventilate, yet temperature of building has to stay cooled at 26 degrees.
Preparation of groove prior to installation. vPanel used for its thermal insulation property to reduce the peak temperature during afternoon.
Bird Nest Project @ Sabah, Malaysia

easy installation of panel by 2 workers
